

Herbert Hebein

**ILLINOIS STATE REPRESENTATIVE**

**Local Government Control**

I am a retired Chicago police officer and a candidate for Illinois State Representative. When an issue impacts a community (close to home) residents of that community should be informed and that community should have a voice. Local government officials are able to understand firsthand the potential effects, and such issues should be addressed immediately.

One issue that has been brought to my attention is the impending rollout of 4G/5G Technology. I am willing to learn more about this topic, the effects it will have on the residents of the local community, and all throughout Illinois. I have also been made aware of SB1451 which strips away local control; however, I am firm believer that local control should be restored. As a State Rep I will continue to become more informed on the issue of 4G/5G Technology and I will keep the people of my district informed.

From my experience as a police officer, I realized all issues were solved better by the CPD department directly when it came to local affairs; rather than bringing in outside agencies to do the job. I am of the opinion that this also holds true for 4G/5G Technology.
